

Technique used by Mark Moslberry in August 2009 for removing graffiti from the Gatwick monument and nearby fence pickets:

For the Monument (sandstone portion):

1. Paint remover. (Protect your skin and eyes and follow directions).
2. Scrub with wire brush.
3. Electric sander, course paper. Use an orbital palm sander.

For the Fence:

1. Sand the entire picket using course Paper with a palm, or preferably a belt sander.
